DETAILED ACTION

Claims 1-9, 12-19, 21 and 22 are pending in the present application. This Office Action is in response to Paper No. 23, filed 16 October 2002 and Paper No. 25, filed 31 December 2002.

Response to Amendment

The rejection of Claim 1 under 35 U.S.C. 101 has been withdrawn in view of Applicant's arguments filed 29 January 2003.

The rejection of claims 2-9 under the judicially created doctrine of obviousness-type double patenting have been withdrawn in view of Applicant's arguments.

Claims 1-9, 12-19, 21 and 22 stand rejected under 35 U.S.C. 102(b) as being anticipated by either Fujiwara et al. (Nucleic Acids Research Vol.26, no24 pp 5728-5733 1998) (hereinafter "Fujiwara A") or Fujiwara et al. (Nucleic Acids Research Vol.26, no24 pp 5734-5737 1998) (hereinafter "Fujiwara B").

Response to Arguments

Claims 1-9, 12-19, 21 and 22 stand rejected under 35 U.S.C. 102(b) as being anticipated by either Fujiwara A or Fujiwara B.

Applicant has presented two arguments in traverse of the present rejections: (1) that the invention is maintained, stabilized, without using DNA ligase; and (2) that the invention performs the conversion of a three-stranded DNA into a ds DNA without any nicks within the cells. Applicant is reminded that claims are given their broadest reasonable interpretation in light of the supporting disclosure. *In re Morris*, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023,

1027-28 (Fed. Cir. 1997). The present claims recite neither that the invention is maintained without DNA ligase nor that the conversion of three-stranded DNA into ds DNA is performed without any nicks. The features upon which applicant relies discussed above are not recited in the rejected claims. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Sequence Compliance

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reasons set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Applicant must comply with the requirements of the sequence rules (37 CFR 1.821 - 1.825) before the application can be examined under 35 U.S.C. 131 and 132. Although Applicant responded to the sequence requirement set forth in the Office Action, mailed on 21 February 2001, Applicant should note that the drawings still contain sequences without referring to a corresponding SEQ ID NO. Applicant is required to correct this deficiency in order to be fully responsive to the instant Office Action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
